

Count on Alpha Wire

Count on us for high-quality, highly engineered cabling solutions delivered with industry-leading accessibility, innovation and service.

For more than a century, manufacturers have trusted Alpha Wire.

A Few Challenging Years

For us, as for so many companies, the unprecedented global pandemic shook our systems and supply chains. Demand skyrocketed. Labor and materials were difficult to source. And we were implementing efficiency-driven updates to our systems. As a result, service levels sometimes didn't live up to our high standards.

Alpha Wire looked on these challenges as an opportunity to evolve. We redoubled our efforts to solidify our place as an essential, reliable partner. We increased capacity, built up inventory and successfully transitioned to new systems – and today, we stand ready to deliver the highest service levels for our customers.

Ready for the Next 100 Years – and Beyond

In recent months, we focused on improving our systems, as well as production, stock levels, and data accuracy and availability. Our efforts mean you can depend on Alpha Wire for the next 100 years and beyond.

The Alpha Wire Advantage

Purpose-driven,
hazard-matched
connectivity
solutions

Industry-leading supplier
of flexible
automation
cabling

Responsive and
consultative
customer
support

Able to
accommodate
small put-ups
and short
minimum runs

Highly
engineered
custom cable
solutions

Heat-shrink
and wire
management
solutions
for varied
environments

A wide
selection of
complimentary
samples

Learning from the Past, Building the Future

We've made many improvements to ensure we continue to be the dependable, reliable, service-oriented supplier you've counted on for years. We're prepared to navigate future challenges better than ever:

- Adapted in a short time to a nearly 100% increase in demand for our products.
- Added 20% more production capacity.
- Increased our distribution capacity.
- Invested in higher levels of raw material supply.
- Shortened our case response times – and targeted more improvements.

Supporting the Industries that Power Our World

Every day, Alpha Wire plays a vital role in industries that make a difference in our world.

- Global semi-conductor manufacturers use Alpha Wire products to increase the availability of computer chips, improving world-wide supply chains.
- Medical companies use Alpha Wire products to make equipment essential for the care of patients, saving lives.
- Engineers rely on Alpha Wire products to solve complex logistical challenges as they develop and operate robots, industrial automation systems, warehouses and order fulfillment centers, helping our economy thrive.

In wind turbines exposed to the elements 24/7, high-tech scientific research facilities, and mission-critical, military-grade applications – to name just a few examples – Alpha Wire delivers the superior performance and reliability required by the world's most demanding industries.

For your convenience, we organize Alpha Wire offerings around specific markets so that you can easily find the products you need for comparable use cases – products with the best match of performance, reliability and fit for your specific requirements.
