

MOUSER

Widest selection of electronic
components in stock™

Ohm's Law relationships:

$$V = I \times R$$

$$I = V \div R$$

$$R = V \div I$$

Power formulas:

$$P = V \times I$$

$$P = I^2 \times R$$

$$P = V^2 \div R$$

Where:

V = Voltage (Volts)

I = Current (Amps)

R = Resistance (Ohms)

P = Power (Watts)
