

## Type CDLC Ultracapacitors | Cornell Dubilier (CDE)

CDE's **type CDLC** high power ultracapacitors offer extremely high capacitance values (farads) ranging from 100 to 3000F with extraordinary cycle life in both snap mount and axial leaded versions. The CDLC series is a good choice for back-up and pulse power applications.

### Type CDLC Features & Benefits:

- High power performance
- Ultra Low ESR Characteristics
- Various termination styles available

### Type CDLC Applications:

- Grid stabilization
- Wind turbine pitch
- Short term UPS
- Industrial power backup
- Renewable energy systems
- Rail system power

### Additional Information:
