Mouser Electronics and T Works Announce Partnership on New State-of-the-Art Prototyping Facility in Hyderabad

April 12, 2021 - [Mouser Electronics](#), Inc. announces a partnership with T Works, an initiative of the Telangana government, to support what will be India's upcoming largest hardware prototyping center in Hyderabad. The new 78,000 square-foot, state-of-the-art prototyping facility will be equipped with over 250 industry-grade tools, such as 3D printers, CNC machines, laser cutters, and PCB fabrication to enable Micro, Small & Medium Enterprises (MSMEs); startups; and individual innovators to convert their ideas into products more efficiently and economically.

“The partnership between T Works and Mouser represents a unique opportunity for electronic components procurement in India,” said Sujai Karampuri, CEO of T Works. “With a strong combination of our technology and process innovation, support from customs-handling partners and a varied range of components from Mouser, startups, makers and SMEs will be able to source components with ease, reducing the barrier in terms of cost, time and complexity.”

“Since our founding, Mouser has always demonstrated a dedication to fostering innovation at every level,” said Mark Burr-Lonnon, Mouser Senior Vice President of Global Service & EMEA and APAC Business. “With this new partnership and the prototyping facility, Mouser and T Works are supporting today's innovators with the resources they need to solve tomorrow's challenges.”

According to the India Hardware Startup Survey conducted by T Works, customs handling and component procurement are two of the major bottleneck activities for hardware prototyping and development. Through this strategic partnership, T Works and Mouser aim to reduce the barriers that the Indian hardware ecosystem face by sourcing high-quality, reliable components for development. The partnership also aims to conduct collaborative events to bring component manufacturers closer to end users through application development support and product demos.

As a global authorised distributor, Mouser offers the world's widest selection of the newest semiconductors and electronic components — in stock and ready to ship. Mouser's customers can expect 100% certified, genuine products that are fully traceable from each of its manufacturer partners. To help speed customers' designs, Mouser's website hosts an extensive library of technical resources, including a [Technical Resource Centre](#), along with product data sheets, supplier-specific reference designs, application notes, technical design information, engineering tools and other helpful information.

About Mouser Electronics

Mouser Electronics, a Berkshire Hathaway company, is an authorised semiconductor and electronic component distributor focused on New Product Introductions from its leading manufacturer partners. Serving the global electronic design engineer and buyer community, the global distributor's website, mouser.com, is available in multiple languages and currencies and features more than 5 million products from over 1,100 manufacturer brands. Mouser offers 27 support locations worldwide to provide best-in-class customer service in local language, currency and time zone. The distributor ships to over 630,000 customers in 223 countries/territories from its 93,000 square-meter, state-of-the-art facilities in the Dallas, Texas, metro area.
